

spiral screens

1

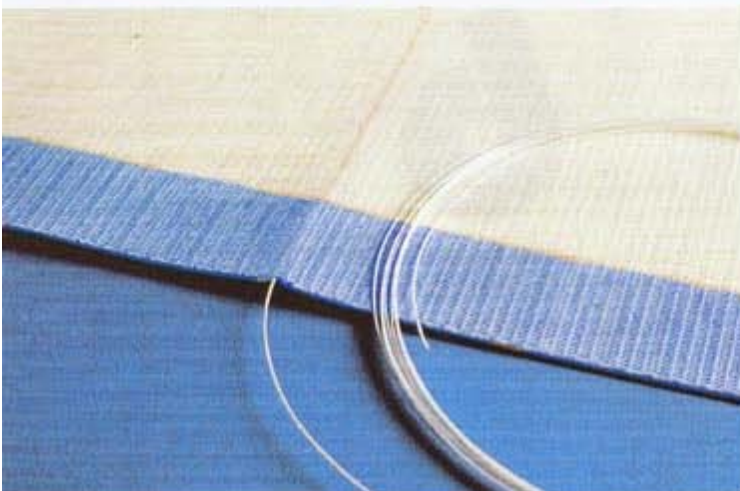

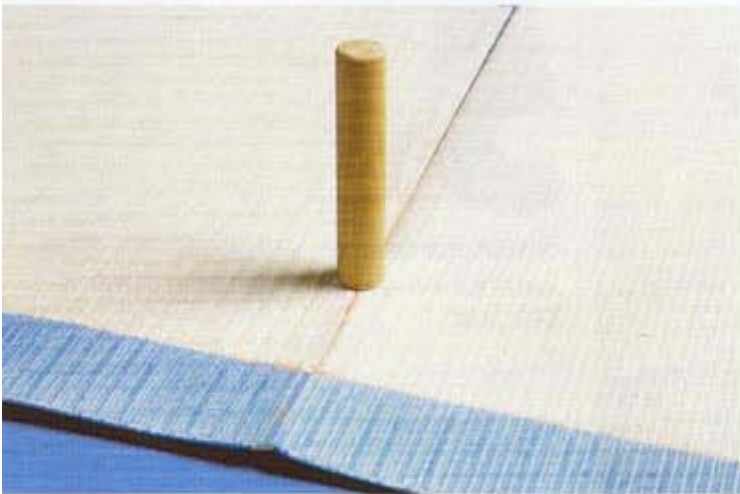

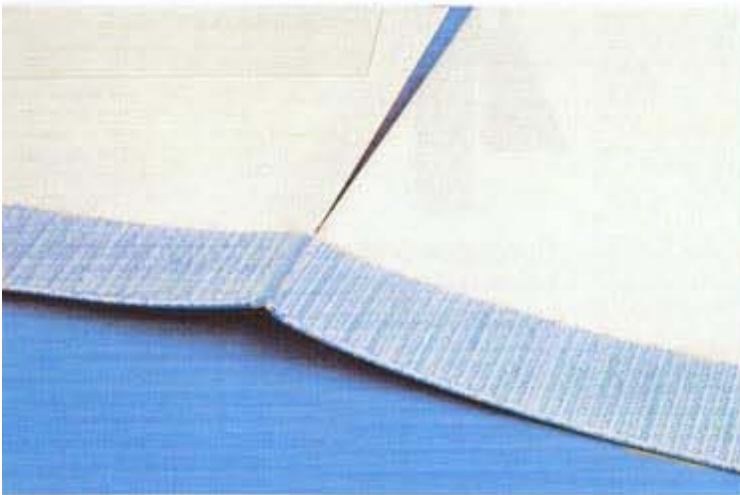

Both ends of the filter bands are accurately justified. They overlap ca. 5 mm.

2

Spirals are joined separately with a round object.

3

Steel wire and polyester wire are connected and drawn through the spirals.

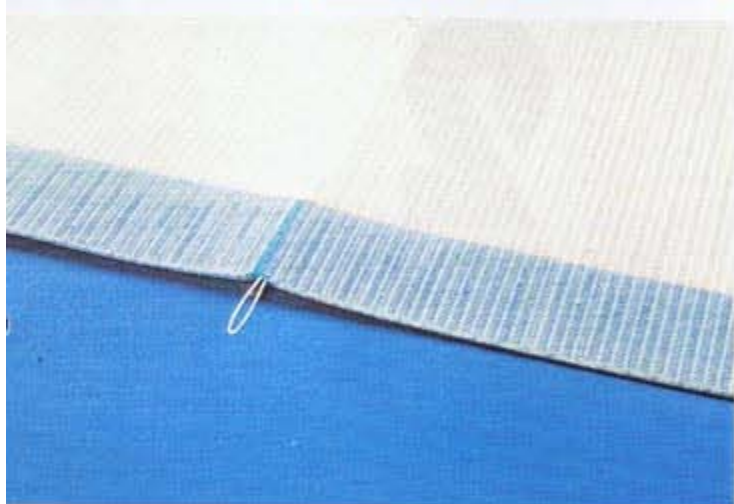

spiral screens

4

Polyester wire is overlapped ca. 10 cm on either side, than cut off.

5

The endings of the polyester wire are contrarily plug in the seam.

6

The seam in the range of bonding is agglutinated by means of the attached adhesive.
